Typed rules, located evidence, accountable disposition
typed rule
hard · hybrid · soft
verifier
locates the span
LLM
quotes inside it
evidence
gate
deterministic
verdict
stored decisions inform later reviews
hard — the verifier decides; absence is a verifier record
hybrid — the verifier locates; the model judges there
soft — a pending item for the expert; never counted
expert disposes
accept / dismiss / rewrite
decision records
stored and inspectable
each finding carries a rule and a location • the model cannot assert absence • the suggested verdict is a deterministic function • the final verdict is written by the reviewer, not the model
